

## MEDICARE QUERIES AND ANSWERS

**1. COO asked how many hospitals does medicare operator ?**

SELECT COUNT(\*) AS total\_hospitals FROM hospitals;

| Result Grid |                 | Filter Rows: | Export: | Wrap Cell Content: |
|-------------|-----------------|--------------|---------|--------------------|
|             | total_hospitals |              |         |                    |
| ▶           | 30              |              |         |                    |

**2. How many doctors ?**

SELECT COUNT(\*) AS total\_doctors FROM doctors;

| Result Grid |               | Filter Rows: | Export: |
|-------------|---------------|--------------|---------|
|             | total_doctors |              |         |
| ▶           | 450           |              |         |

**3. How many departments ?**

SELECT COUNT(\*) AS total\_departments FROM departments;

| Result Grid |                   | Filter Rows: |
|-------------|-------------------|--------------|
|             | total_departments |              |
| ▶           | 40                |              |

**4. How many doctors have more than 10 years of experience ?**

SELECT COUNT(\*) AS total\_doctors FROM doctors WHERE experience\_year >10;

| Result Grid |               | Filter Rows: | Export: | Wr |
|-------------|---------------|--------------|---------|----|
|             | total_doctors |              |         |    |
| ▶           | 309           |              |         |    |

**5. Total bed capacity across all hospitals.**

SELECT SUM(bed\_capacity) AS bed\_capacity from hospitals;

| Result Grid |              | Filter Rows: | Export: | Wrap Cell Content: |
|-------------|--------------|--------------|---------|--------------------|
|             | bed_capacity |              |         |                    |
| ▶           | 7672         |              |         |                    |

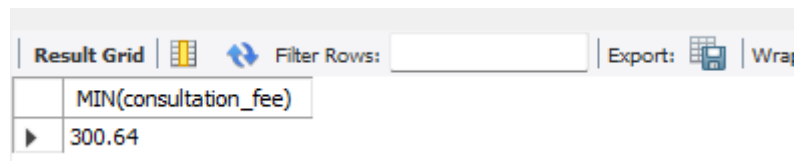

**6. Average consultation\_fees?**

SELECT AVG(consultation\_fee) AS consultation\_fee FROM doctors;

| Result Grid |                      | Filter Rows: |
|-------------|----------------------|--------------|
|             | avg_consultation_fee |              |
| ▶           | 912.65               |              |

**7. What is the lowest consultation\_fee?**

```
SELECT MIN(consultation_fee) FROM doctors;
```

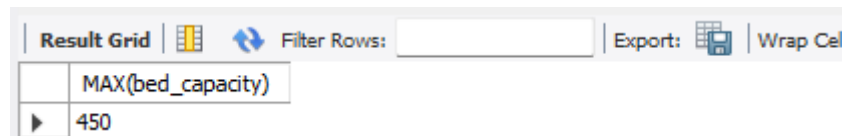

The screenshot shows a database query result grid. At the top, there are tabs for 'Result Grid', a grid icon, a refresh icon, and a 'Filter Rows:' input field. To the right are 'Export:' and 'Wrap' options. The table has one column with the header 'MIN(consultation\_fee)' and one row with the value '300.64'.

| MIN(consultation_fee) |
|-----------------------|
| 300.64                |

**8. Highest hospitals bed\_capacity ?**

```
SELECT MAX(bed_capacity) FROM hospitals;
```

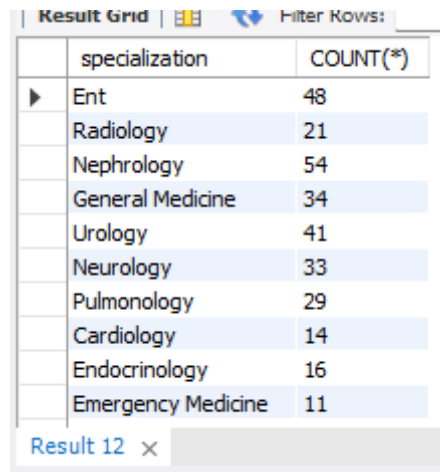

The screenshot shows a database query result grid. At the top, there are tabs for 'Result Grid', a grid icon, a refresh icon, and a 'Filter Rows:' input field. To the right are 'Export:' and 'Wrap' options. The table has one column with the header 'MAX(bed\_capacity)' and one row with the value '450'.

| MAX(bed_capacity) |
|-------------------|
| 450               |

**9. How many doctors are there in each specialization?**

```
SELECT COUNT(*) FROM doctors GROUP BY specialization;
```

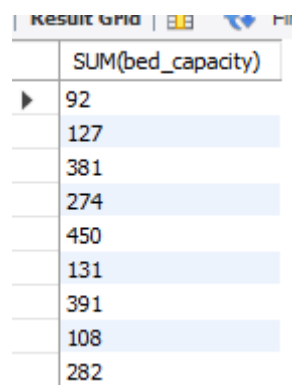

The screenshot shows a database query result grid. At the top, there are tabs for 'Result Grid', a grid icon, a refresh icon, and a 'Filter Rows:' input field. The table has two columns: 'specialization' and 'COUNT(\*)'. It lists ten specializations with their corresponding doctor counts. At the bottom, there is a 'Result 12' label with a close button.

| specialization     | COUNT(*) |
|--------------------|----------|
| Ent                | 48       |
| Radiology          | 21       |
| Nephrology         | 54       |
| General Medicine   | 34       |
| Urology            | 41       |
| Neurology          | 33       |
| Pulmonology        | 29       |
| Cardiology         | 14       |
| Endocrinology      | 16       |
| Emergency Medicine | 11       |

**10. How many beds each hospital have?**

```
SELECT SUM(bed_capacity) FROM hospitals GROUP BY hospital_name;
```

The screenshot shows a database query result grid. At the top, there are tabs for 'Result Grid', a grid icon, a refresh icon, and a 'Filter Rows:' input field. The table has one column with the header 'SUM(bed\_capacity)'. It lists ten values representing the total bed capacity for each hospital.

| SUM(bed_capacity) |
|-------------------|
| 92                |
| 127               |
| 381               |
| 274               |
| 450               |
| 131               |
| 391               |
| 108               |
| 282               |

**11. How many bed capacity where greater than 300 ?**

```
SELECT bed_capacity FROM hospitals WHERE bed_capacity>300;
```

Result Grid

 Filter Rows:

|             | General Medicine | 34                                                                                  |                                                                                                  |     |
|             | Ophthalmology    | 33                                                                                  |                                                                                                  |     |

**14. Give me each department along with the hospital it belongs to ?**

```
SELECT departments.department_name,  
       hospitals.hospital_name  
FROM departments  
JOIN hospitals  
ON departments.hospital_id = hospitals.hospital_id;
```

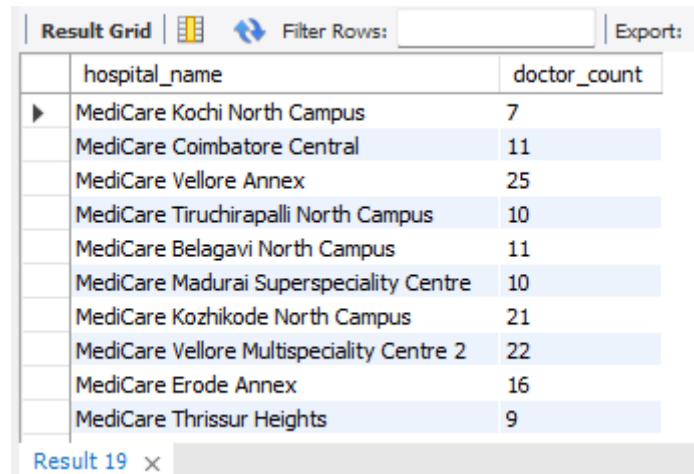

The screenshot shows a 'Result Grid' with two columns: 'department\_name' and 'hospital\_name'. It lists 10 departments and the hospital they belong to.

| department_name    | hospital_name                           |
|--------------------|-----------------------------------------|
| ENT                | MediCare Kochi North Campus             |
| Emergency Medicine | MediCare Coimbatore Central             |
| Ophthalmology      | MediCare Vellore Annex                  |
| Cardiology         | MediCare Vellore Annex                  |
| Neurology          | MediCare Tiruchirapalli North Campus    |
| Ophthalmology      | MediCare Belagavi North Campus          |
| Neurology          | MediCare Madurai Superspeciality Centre |
| Urology            | MediCare Kozhikode North Campus         |
| General Medicine   | MediCare Kozhikode North Campus         |

**15. Select how many doctors are associated with each hospitals?**

```
SELECT hospitals.hospital_name,  
       COUNT(doctors.doctor_id) AS doctor_count  
FROM doctors  
INNER JOIN hospitals  
ON doctors.hospital_id = hospitals.hospital_id  
GROUP BY doctors.hospital_id;
```

The screenshot shows a 'Result Grid' with two columns: 'hospital\_name' and 'doctor\_count'. It lists 12 hospitals and the number of doctors associated with each.

| hospital_name                             | doctor_count |
|-------------------------------------------|--------------|
| MediCare Kochi North Campus               | 7            |
| MediCare Coimbatore Central               | 11           |
| MediCare Vellore Annex                    | 25           |
| MediCare Tiruchirapalli North Campus      | 10           |
| MediCare Belagavi North Campus            | 11           |
| MediCare Madurai Superspeciality Centre   | 10           |
| MediCare Kozhikode North Campus           | 21           |
| MediCare Vellore Multispeciality Centre 2 | 22           |
| MediCare Erode Annex                      | 16           |
| MediCare Thrissur Heights                 | 9            |

**16. Show me every hospitals, even if it currently has no department?**

```
SELECT hospitals.hospital_name, departments.department_name  
FROM hospitals  
LEFT JOIN departments  
ON hospitals.hospital_id = departments.hospital_id;
```

| Result Grid |                                           |                    | Filter Rows: | Export: |
|-------------|-------------------------------------------|--------------------|--------------|---------|
|             | hospital_name                             | department_name    |              |         |
| ▶           | MediCare Kochi North Campus               | ENT                |              |         |
